About Me

A Passionate Adventurer

One year ago, I wanted to start from scratch in an unfamiliar place. I wanted to give myself a huge challenge and motivation. So I went to Italy with knowing nothing, knowing no one and it brought me thrilled. Fortunately, it went out of one of my successful experiences. And this motivation leads to me to learn programming language, and I am enjoying it a lot. For this time, I like to keep moving forward as a frontend developer.

Achievement

Find Music Dot Com <https://jihyelee-sophia.github.io/findmusicdotcom/>

With 'React Js' using API, I have developed Music Single Page Application. You can search and preview the music you want. I used my pictures as background images to remember the motivation about my life.

Todo List Web Page https://jihyelee-sophia.github.io/miniproject_vanillajs_todolist/

You can easily add a list and change the theme color. The background will be changed every 5 minutes or by pressing the refresh button. I have developed with HTML, CSS, and Vanilla Javascript without any frameworks and libraries.

Baby Jump Web Game https://jihyelee-sophia.github.io/miniproject_vanillajs_babyjump/

I still remember how I felt when I could finally make 'jump' successful. You have to jump or double jump to avoid spikes and eat fruits to score. Some of the fruits will give you different effects. To develop this game, I didn't use any frameworks and libraries. I have developed with HTML, CSS, and Vanilla Javascript.

Language

English

→ Also, I am studying..
Italian

Skill

Javascript

HTML

CSS

Typescript

React Js

Education

Hansei University

📅 03.2009 - 02.2014 (5years)

Major

Social Welfare

Minor

Computer engineering

GPA 3.6 / 4.5

📍 Seoul, South Korea
