About Me

A Passionate Adventurer

One year ago, I wanted to start from scratch in an unfamiliar place. I wanted to give myself a huge challenge and motivation. So I went to Italy with knowing nothing, knowing no one and it brought me thrilled. Fortunately, it went out of one of my successful experiences. And this motivation leads to me to learn programming language, and I am enjoying it a lot. For this time, I like to keep moving forward as a frontend developer.

Achievement

Todo List Web Page https://jihyelee-sophia.github.io/miniproject_vanillajs_todolist/

I used my pictures as background images to remember the motivation. You can easily add a list and change the theme color. The background will be changed every 5 minutes or by pressing the refresh button. I have developed with HTML, CSS, and Vanilla Javascript without any frameworks and libraries.

Baby Jump Web Game https://jihyelee-sophia.github.io/miniproject_vanillajs_babyjump/

I still remember how I felt when I could finally make 'jump' successful. You have to jump or double jump to avoid spikes and eat fruits to score. Some of the fruits will give you different effects. To develop this game, I didn't use any frameworks and libraries. I have developed with HTML, CSS, and Vanilla Javascript.

My Own Web Site https://jihyelee-sophia.github.io/miniproject_react_myweb/

I have developed my first web site about introducing myself. I used React Js Single Page Application. I am keep going to upload my pages to express myself.

Language

English

→ Also, I am studying..
Italian

Skill

Javascript HTML CSS Typescript React Js

Education

Hansei University

📅 03.2009 - 02.2014 (5years)

Major

Minor

Social Welfare

Computer engineering

GPA 3.6 / 4.5

📍 Seoul, South Korea
